

Geography

TOPIC	Intro	Conclusion	Data
General		<u>Geophysical phenomena</u> - Through vigilant monitoring, innovative modeling, and cross-disciplinary collaboration, we can better predict and address <u>geophysical events</u> , <u>safeguarding lives and ecology</u> .	
Oceanography	Movement of ocean water is influenced by physical characteristics like temperature, salinity, and external forces like sun and the winds.	Investing in oceanographic research is imperative to <u>safeguard marine ecosystems</u> and <u>secure dependent livelihoods</u> .	Ocean covers 71% of the planet and holds 97% of the water - thus acting as a key factor in storage & transfer of heat energy
Ocean currents	Continuous Horizontal movements of sea water, that circulate throughout the world's oceans Ex: warm & cold, surface (upto 400 m) & deep water currents	Ocean currents, Earth's silent climate conductors, demand <u>focused research</u> and <u>global collaboration</u> to <u>unravel their intricate roles</u>	Primary forces: - Insolation - Gravity - Coriolis - Atmosphere circulation Ex: <u>Monsoon</u> Secondary forces: - Salinity - Temp - Land obstruction
El Nino	El nino is a climate phenomenon that describes the unusual warming of surface water in the eastern tropical pacific ocean	El Niño's disruptive influence on India's monsoon patterns can severely jeopardize Indian agriculture & food security, underscoring the urgent need for <u>adaptive strategies and resilient farming practices</u>	Inverse relation with Indian monsoon - Ex: since 1871 - 6 major droughts attributed to it <u>SEA forest fires</u> <u>Coastal flooding in S America</u> <u>Low hurricanes in Atlantic (HP)</u>
La Nina	El nino is a climate phenomenon that describes the unusual cooling of surface water in the eastern tropical pacific ocean	While La Nino is beneficial for Indian monsoon, the unpredictable & disruptive influence of alternating El Ninos can....	<u>Tornado & hurricane in N America</u>
ENSO	Southern Oscillation refers to a coherent see saw fluctuation of atm pressure over tropical indo pacific. Since El Nino & SO mostly collide, the combination is called ENSO.	Same as above	
Indian Ocean Dipole	IOD refers to the difference in sea surface temperature b/w western & eastern Indian Ocean <u>El Nino – Pacific Ocean</u>	<u>Same as ocean currents</u>	<u>+ve IOD = good for indian monsoon, more cyclones in AS</u>

	<u>IOD – Indian Ocean</u>		
<u>Distribution of Ocean Temperature - vertical & horizontal</u>	Study of ocean temperature is imp for understanding - Movement of ocean currents - Type & distribution of marine organisms at various depths - Coastal climate	“The escalating ocean temperatures pose a <u>stark reminder</u> of the <u>urgent need for global action</u> to mitigate climate change's <u>cascading effects</u> on marine ecosystems, weather patterns, and coastal communities.”	Avg temp of oceans is 17 degrees - measured by isotherms Ocean temperature has risen by 1.2 degrees since pre-industrial levels. <u>Climate change</u>: Marine heatwaves, Stratification, Deoxygenation, Algal blooms, Arctic amplification
<u>Ocean Salinity</u>	Refers to the total content of dissolved salts in seawater affected by evaporation, temperature & precipitation	Pivotal role in influencing movement of ocean currents, climatic processes like evaporation & precipitation, thereby necessitating greater attention and understanding.	
<u>Polar Vortex</u>	Counter-clockwise polar cyclones in both poles in the upper atmosphere due to LP that keeps colder polar air confined to the poles.	The polar vortex / ____ highlights the delicate equilibrium of earth's climatic processes, necessitating greater scientific studies to understand its behavior, anticipate disruptions, and bolster resilience against the challenges it may pose.	
<u>Continental Drift theory</u>	Proposed by Alfred Wegner in 1912, CDT proposes that Earth's landmasses were once interconnected as a single supercontinent and have since drifted apart over geological time	Geographers have combined knowledge from CDT, plate tectonics & other theories to explain the various physical features & geological phenomena.	200 million years ago - split started
<u>Sea-Floor Spreading</u>	Harry Hess's sea-floor spreading theory proposed that new oceanic crust is formed at mid-ocean ridges, driving the gradual movement of tectonic plates	These theories, combined with modern tech advancements, have helped humankind predict various disasters more efficiently thus making lives more secure & the economy more resilient.	Based on Arthur Holmes' convection current theory (heat from radioactive decay inside earth creates magma that rises up to form convective currents = the force behind sea floor spreading) Evidence: Normal & reversing magnetic polarity
<u>Plate tectonics theory</u>	Proposed by Mckenzie, Parker & Morgan in 1967, PTT explains the horizontal movement of 7 major & several minor lithospheric plates over the asthenosphere, shaping various geological features through plate boundary interactions.	PPT offers a comprehensive framework in undg the distribution of continents, oceans, geological features, and geophysical phenomena, <u>enabling a more effective understanding and management of its effects.</u>	
<u>Jet Streams</u>	Jet streams are geostrophic high velocity winds (400-500 km / hr) blowing horizontally through upper layers of troposphere from west to east (20K to 50K ft.)	In Indian context - significant role in onset & withdrawal of monsoon <u>underscoring need for greater undg for ____</u>	<u>Determinants:</u> - Air mass of varying temp - Pressure gradients - Coriolis - Landmass Ex: Tibet
<u>Distribution of earthquakes & volcanoes</u>	Don't just occur anywhere. Distribution is best explained by interplay of plate tectonics, geological features & geophysical	Same as geophysical phenomena (understanding the distribution of __ coupled with monitoring, modeling, interdisciplinary - can help us	Almost 90% of the world's volcanoes and 81% of the world's most devastating earthquakes occur in the Pacific Ring of Fire region

	<u>processes inside the earth.</u>	<u>better safeguard vulnerable communities from its effects & reduce ecological impacts.</u>	
Pacific Ring of Fire	Large arc of active convergent plate boundaries surrounding the Pacific Ocean marked by high levels of volcanic & seismic activity.	same	

RESOURCES

FORESTS	As per IFSR - India's total forest + tree cover = 24.6% against NFP 1988 target of 33%	Replace outdated NFP 1988 with one in tune with dynamic realities of climate & development landscape & incorporating active participation of all stakeholders including indigenous communities, & experts for sustainable forest management. Key role in achieving Panchamrut goal of net 0 by 2070.	Recent dilution of Forest Conservation Rules, 2022 Steps: - Green India, Laws - CAMPA 2016 - NCAVES - NAP to combat desertification - NDC - 2.5-3 billion tonnes carbon sink BP: - JFM - Maldharis Gir - Eco-feminism - 111 trees every girl child
FRA	The FRA 2006 aims to recognize the rights of indigenous and forest-dwelling communities over Jal, Jangal & Jameen & ensure democratic forest governance & conservation	Emulate the BP of Budaguda Gram Panchayat - OD - civil society roped in for community mobilization & hand-holding apart from use of RTI to speed up claim settlement	Rights: - Title - Use - Relief - illegal eviction & displacement - Forest <u>management rights</u> Article 48A Issues: - Administrative apathy - Unwillingness of Forest Bureaucracy to share powers - Misuse - encroachment
COAL	Most important (55% energy needs) & abundant fossil fuel in India (4th largest reserves) TPPs - 70% installed capacity 2nd largest importer despite 4th largest reserves	JETP for energy transition of TPPs along with shift to cleaner tech like coal gasification, CBM, CCUS Steps: Natl Coal Gasification Mission - 100 MT 2030 Sustainable devel cell in Coal ministry COP 26 - Phase down NG bridge fuel 6-15% Liberalised entry norms, revenue sharing Green H2 for steel	Distribution: RJ, GJ, TN, AS - Tertiary Damodar Mahanadi Godav - Gondwana China - Shanxi, US - Appalachian, Russia, Aust, S Af Issues: High Ash (20-30%), sulphur (3-7%), techniques - open cast, rat hole 2x more emissions than NG Coal India 80% share
RE	RE , drawn from sunlight ,	"Energy is necessary for	India is the 3rd largest

	wind, water, etc offers an eco-friendly alternative to fossil fuels, contributing to energy security and sustainability.	development & sustainable energy is necessary for sustainable development” - Tim Wirth Panchamrut - 50% RE, 500 GW	producer of RE in the world + RE growth rate 2nd largest in world 3rd largest oil importer & rising oil demand will 2x our import bill by 2030 Decentralised Ex: Daman Initial invt cost - 4cr/MW coal vs 6 cr/MW RE Prices reducing so DISCOMS reluctant for LT PPA
<u>SOLAR</u>	Installed capacity of 60GW against potential of 750 GW as per NISE Diagram - solar tariff	Task not of govt. or one agency alone. All stakeholders... Panchamrit - 500GW RE underscores the need for removing barriers ex. finance, technology collaborations for cheaper battery storage & private participation for greater adoption. Steps: - ISA - OSOWOG, - PLI - Natnl Solar Mission - KUSUM - Wind Solar Hybrid policy	GIBI issue
<u>WIND</u>	Installed capacity of 40 GW against potential of 120 GW India 4th largest wind energy producer in the world	- National Offshore Wind energy policy, - Wind solar hybrid policy Same as solar	
<u>CBM</u>	Unconventional form of natural gas found in coal deposits	Panchamrit - carbon intensity by 45% necessary to shift	
<u>NATURAL GAS</u>	India recently set a target of increasing share to 15% by 2030 from present 6% 45% met through imports GAIL - 70% share	Kirit Parekh committee - marketing & pricing freedom, Cover under GST, PPP for pipeline infra Bridge fuel Steps: - HELP- standard licensing + revenue sharing - SATAT - compressed biogas - vehicles - URJA Ganga, NE gas Grid - Indian Gas exchange - better price discovery	Reducing dependence on coal & oil for energy demands (3rd largest energy consumer - IEA) India - Gulf of Kutchh & Khambhat, Mum High, K-G, KaveriAndaman World - Gulf of Mexico, North Sea, Baltic Sea, Sakhalin, E Siberia Adv: access through pipelines, diversified resources
<u>ENERGY MIX</u>	Total installed capacity of 401 GW (Sept 2022)	Quote of Tim Wirth	Central Electricity Auth - India’s energy consumption set to double by 2040

	<u>50% coal</u> <u>40% RE incl large Hydro (160GW)</u> <u>6% Gas</u> <u>4% others</u>		160 GW = 60 solar, 40 wind, 5 small hydro, 10 biomass, 45 large hydro
<u>STRATEGIC / CRITICAL MINERALS</u>	Refers to the category of minerals essential for economic dev & national security, the lack of availability of which may lead to supply chain vulnerabilities. <u>Ex: lithium, cobalt, tungsten, rare earth</u>	Investing in Critical minerals today is key for securing technological sovereignty & a green transition tomorrow <u>Suggestions -</u> - <u>Bilateral</u> with Australia, S Africa, Canada etc - <u>MSP</u> - Minerals Security Partnership of USA - <u>PMN - deep Ocean mission</u> - <u>Resource use efficiency</u>	Economic potential (cutting edge, low substitutability, GVA multiplier, etc) + supply risk <u>100% import of most of them</u> <u>Ex: Lithium, cobalt, nickel</u> <u>Steps:</u> - <u>KABIL</u> - <u>30 identified by expert committee under ministry of Mines</u> - <u>CoE to be set up</u>
<u>RARE EARTH</u>	Set of 17 metallic elements with unique magnetic & electrochemical properties & wide ranging applications <u>Why rare - tech difficulties in extracting from low concentrations</u> <u>India has 6% reserves but produces 1% of global output</u>	Setup <u>Indian Rare Earth Mission</u> on lines of <u>semiconductor mission</u> to promote exploration & self-sufficiency Same as critical minerals - MSP, bilateral, resource use efficiency <u>Steps:</u> - <u>IREL: given monopoly</u> - <u>Mines & Minerals Amendment Act-EODB</u>	- <u>Demand high - (electronics)</u> - <u>Futuristic (EV, superconductivity)</u> - <u>Strategic - nuclear, defence</u> - <u>Envnt - Wind turbines</u> <u>Global - Vietnam, Brazil, China, Russia, USA, Australia</u> <u>Data:</u> - <u>100% import dependence for 7/12 with no declared sources</u> - <u>Resource Grab - Chinese control 95%</u> - <u>Extraction dilemma (envnt)</u>
<u>LITHIUM</u>	AKA white gold, it is a lightweight highly reactive metal known for its electrical properties & imp role in battery technologies. <u>Recently Reasi district of JK me + KN Mandya me discovered by GSI</u>	“If oil powered the world in the 20th CE, lithium could play that role in the 21st CE” - <u>Look for alt - solid state batteries, aluminium air batteries</u> - <u>Explore Hydrogen fuel cells</u> <u>Steps:</u> - <u>KABIL</u> - <u>PLI - batteries</u> - <u>India building world’s largest grid scale storage facility @ Ladakh & Kutch</u>	<u>Data:</u> - <u>B/w 2016-2019 forex spend on lithium import tripled</u> - <u>4 chinese mining firms control 75% global market of lithium</u> - <u>Envnt hazards in mining</u> <u>Distribution -</u> <u>World - AB(Boliv)C triangle, RUCCA (Russia, US, China, Canada, Aus),</u> <u>India - KN Mandya, (MP, CG, JH, BH,) JK, RJ, ML</u>
<u>COBALT</u>	A strategic mineral with very high melting point known for its critical role in manufacture of lithium ion batteries, electronics & various strategic applications	<u>same as strategic minerals</u> One of the 30 minerals identified by expert committee	<u>Distribution -</u> <u>RUCCA</u> <u>Congo - DRC</u> <u>Indian, Pacific ocean</u> <u>50% chinese control on refining</u>

<u>URANIUM + THORIUM</u>	Uranium/ Thorium is a radioactive element used as fuel in Nuclear reactors to produce energy. <u>3 stage:</u> PHWR FBR Thorium based breeder reactor	Balanced approach needed of harnessing the potential while safeguarding against health & security risks Given vast reserves of thorium, focussed invt. in R&D tech for expediting throrium based generators - make India energy secure as well as leverage export potential.	<u>Data:</u> India has only 2% of the world's Uranium reserves (import dependent) vs 25% of the world's Thorium reserves. <u>Distribution:</u> <u>India</u> - Aravallis (RJ), Bhima basin (KN), ML, JH - Jaduguda, AP - Pedagattu <u>Thorium advantages</u> - proliferation x easy, safer, cheaper, less waste
<u>NUCLEAR ENERGY</u>	Nuclear energy is the <u>5th largest source</u> of electricity in India (2% of total power generation - 7 GW) <u>SK President</u> recently changed the energy policy to raise the share of nuclear power to 30% by 2030. <u>Japan</u>, is restarting reactors to diversify from coal, NG as is <u>UK</u>	Going for small modular reactors can help solve safety issues while ensuring energy security + sustainab <u>Steps:</u> - India working on "Bhavni" - fully indig thorium-based NPP - Govt allowed JVs b/w NPCIL & PSUs	<u>Data:</u> NPP costs only 33-50% of a coal plant Reliable, high density source - can be turned off / on any time <u>Plants</u> - <u>Rawatbhatta</u> RJ Upcoming in Gorakhpur HR Kakrapar, Jaitapur, Kaiga, Kalpakkam
<u>MINERAL OIL</u>	Aka 'Liquid gold,' it is a complex hydrocarbon resource that powers economies, fuels industries, and underpins modern life.	Transition towards cleaner alternatives - quote <u>Mkt based benefits:</u> - Mkt life > oil well life - Ancillary ind : pharma, chemicals, plastic, fert - Insulation from pol instab	<u>Distribution:</u> <u>India</u> - Barmer, Khambhat, Mumbai High, Brahmaputra valley, KG <u>World</u> - Venezuela, Siberia, W Africa - rest same as NG <u>Refineries</u> - Oil field based: Mum, Digboi Mkt based: Bhatinda, Panipat, Mathura, Guwahati, Port based: Vyzag, Jamnagar
<u>COMMON for MINERALS</u>	___ is a naturally occuring material that holds a distinct place in <u>modern industries/energy security</u> due to its exceptional qualities and wide ranging applications.	In line with commitments under <u>SDG 12</u> - we must seek responsible extraction, equitable distribution, and sustainable use of minerals for balancing prosperity with LT wellbeing.	<u>Belts:</u> - <u>Himalayan</u> - gold, cu, coal, lead - <u>NW Belt (RJ)</u>- non ferrous - uranium, gypsum, zinc, petroleum, silver, cu - <u>Central</u> - marble, bauxite, limestone, gemstone - <u>NE peninsula</u> - 90% iron, 80% coal - <u>S W belt</u> - monazite, iron
<u>PMN</u>	Rounded rock concretions found on the ocean floor containing valuable metals like manganese, nickel, copper, and cobalt	Deep Ocean mission which is developing tech for deep sea mining can be a game changer - but must do so responsibly without damaging deep sea ecosystems	<u>Steps:</u> Pioneer investor status in Central Indian Ocean - 380 mn tonnes resource potential - 10% recover enough for meeting energy reqts for 100 years
<u>POTENTIAL RESOURCE REGIONS</u>	The region of ___ located in ___ holds immense promise of diverse and potentially valuable	Exploiting the potential of ___ unveils not only new opportunities & challenges, but also	<u>Common resources:</u> <u>Minerals,</u> energy (RE - HEP + oil gas coal

	resources that could shape global <u>economies</u>, <u>ecology & geopolitics</u>. 3 P = politics, petroleum, protein	responsibilities on a global scale.	uranium etc), water, biodiversity (reefs), forests trade routes, Fisheries - marine, inland livelihood - tourism, etc + Climate change, blue economy Ghana - gold, Angola - diamond, Uranium - horn of Africa
<u>DEEP OCEAN MISSION</u>	Recently MoES has developed the Deep Ocean Mission to support blue economy initiatives of govt.	"The declaration of 2021-2030 as the decade of ocean sciences <u>underscores</u> the imperative to <u>harness ocean resources responsibly and collaboratively</u> for a resilient and prosperous future." Neel Kranti se arth kranti"	Components - - Tech dev for <u>deep sea mining</u> - Ocean <u>climate change advisory</u> - <u>Bioprospecting</u> - deep sea flora fauna - OTEC powered <u>desalination</u> <u>Other scheme</u>: OMSART
<u>SAMUDRAYAAN</u>	Recent implosion of Titan submersible has brought renewed focus on India's Samudrayaan mission 2026.	Same as above	three ppl to 6000 m depth in 'MATSYA 6000' - 12 hours endurance NIOT designed <u>Other blue economy init</u> Sagarmala India Norway TF on BE ICZMP
<u>SHALE</u>	Refers to natural gas that is trapped within sedimentary shale formations	Abundant availab can help reduce import dependence - SDG 6 <u>Steps:</u> <u>HELP</u>	<u>India</u> - RJ, Vindhya basin, Cambay, KG, Kaveri, Upper AS, Arakan basin <u>World</u> - Gulf of Mexico, Patagonia, Russia, Xinjiang - China, Gulf of Carpentaria (Australia) <u>Issues:</u> water intensive, water contamination, leakage of methane, guar gum price rise, land acquisition
<u>RESOURCE MANAGEMENT & CONSERVATION - minerals, energy, water</u>	As per Global Footprint Network - humanity's demand for resources is now equivalent to that of > 1.7 Earths	The environment and the economy are really both two sides of the same coin. You cannot sustain the economy if you don't take care of the environment." - Bruce Lipton India's LIFE mission + SDG 12 - dd & ss side both imp	<u>Strategies</u> - - 5R - linear to circular - Localised inclusive solutions Ex: social forestry, IWSM + agro climatic planning - Tech to reduce waste & increase yield - Ex: 3D printing, <u>precision farming</u> - More from less Ex: <u>HYV, micro irrigation</u> - <u>Mindfulness</u> - LiFE - <u>Conservation</u> (natnl + intl) - Restoring degraded landscapes Ex: Bonn - <u>EPR</u> - Cultural wisdom - sacred

LOCATION

History - Choti book for examples, Here only intro conclusion quotes

TOPIC	Intro	Conclusion	Value Addition
Template	<u>I2MPRO -</u> <u>Ideologies -</u> - moderates, extremists, revolutionary, socialistics, communists, liberals, conservative <u>Intl events -</u> - World wars, great depression, French revolution, Industrial Revolution <u>M - Movements -</u> - Swadeshi, NCM, CDM, Quit India, INA <u>P - Participants -</u> - Women, intelligentsia, workers, peasants, tribals, foreigners, capitalists, Muslims, civil <u>R - Rule through -</u> - Land revenue system - R, M, Z - Brain Drain - Education, Admin, Press - Acts <u>O - Opposition to INC -</u> - Muslim League, Princely states, etc	Art 51 A - Moral Duty: cherishing noble ideals of freedom struggle Gandhi - "I am not interested in freeing India merely from the British Yoke but from any yoke whatsoever." Thus the aim remained Swaraj from all forms of exploitation noy just the British. Show significance for next step in history	
1857 revolt	The 1857 revolt was the first major organised resistance against economic, social, political & military policies of British EIC in India to	R C Majumdar - 1857 revolt was neither 1st nor war nor for independence V D Savarkar - 1st national war of independence S B Choudhary - first time that for more than a year different regions led a concerted struggle to eject an alien power - never before seen in indian history Stanley Wolpert - more than a mutiny, less than 1st war of independence	
Socio-religious reform movements		Gandhiji - The aim of socio religious reform movements was not to change the face of religion but to revive the essence of humanity which had been forgotten.	

<u>Moderates phase</u>		Bipin Chandra - "1858-1905 was the seed time of Indian nationalism. The early moderates sowed these seeds deep and well"	
<u>Extremists phase/ Militant nationalism</u>		"Extremists are the dreamers of a liberated India, willing to walk the untrodden path for freedom." - Lala Lajpat Rai	
<u>Revolutionaries</u>		"Extremism in the pursuit of liberty is no vice; moderation in the pursuit of justice is no virtue." - Bhagat Singh S C Bose - The ultimate objective of revolutionaries is not to terrorise but to install a national government	
<u>Swadeshi movement</u>		L Risley - Bengal united is power. Divided it will pull in several different ways.	
<u>NCM</u>			
<u>CDM</u>			
<u>Quit India movement</u>			
<u>Gandhian phase/ Gandhi</u>		In the Indian freedom struggle, the Moderates laid the foundation, on which the extremists built the road, which the revolutionaries strengthened with their blood & finally Gandhi walked on it with the masses towards independence. If humanity is to progress, Gandhi is inescapable. We may ignore him at our own risk - MLK Ellen Wilkinson - gandhi was the best policeman the British could have	
<u>Princely states</u>			
<u>India on eve of british conquest</u>			
<u>Advent of Europeans</u>			
<u>Working class movements</u>			
<u>Peasant movements</u>		Bentick - "Bones of the cotton weavers are bleaching the plains of North India"	
<u>Tribal movements</u>			
<u>Economic impact</u>		G V Joshi - Expenditure on rail was an indian subsidy to the British industries G S Iyer - When foreign capital is sunk - administration becomes concern of bond holders R C Dutt - Taxation by king	

		is like moisture sucked by sun - comes as fertilising rain. "British rule stripped India of \$45 trillion and 45 million lives. British rule in India was not benign, but brutal, and its rapacity left India in deep poverty." - Shashi Tharoor	
<u>Indian Press</u>		"The press was the ink-stained weapon that fought not with bullets, but with ideas, stirring hearts and awakening minds." - Bal Gangadhar Tilak	
<u>Education</u>		India broke the British fetters with English hammers.	
<u>Resistance before 1857</u>			
<u>Princely states</u>		British & princes both needed each other to survive. However India's need for either is highly doubtful.	
<u>Civil services</u>		Nehru - neither Indian, nor Civil nor a service	
<u>INA</u>			
<u>Contribution - NE, women, foreigners, capitalists, socialists</u>		"The diverse threads of society wove together in the fabric of the freedom struggle" - Bipin Chandra Pal "History to Herstory" – remember & recognise the impact of women in the freedom struggle <u>National Digital District Repositories</u> - use for documenting contribution of various sections to the Indian freedom struggle. <u>TRIBALS</u> - PM Modi - "unfortunately tribals have not got the place they should have in the pages of history" To remember & recognise the imp role of tribals in the pages of history - various steps :- - Birsa Munda's anniversary as Adivasi Gaurav Diwas - District digital repositories - Adivasi museums Society - Aadi Mahotsav to showcase their culture	
<u>Personalities common</u>		Show relevance/legacy of their ideas today or for the movement Ex: Tilak - press freedom, community festivals/ foundation for Gandhian	

		<u>phase</u> The rich legacy of ideas of _____ continues to fuel our aspirations for a better India.	
<u>Swarajists, no changers</u>			
<u>Growth of communalism</u>		Maulana Mohammed Ali - <u>“We divide they rule”</u> R J Moore - The process of devolving power by stages in a socially politically desperate country is inherently divisive	
<u>Acts</u>		GOI Act 1909 - Montford - afforded no answer & couldn't afford any answer to Indian problems GOI Act 1919 - It is a method of further draining India of its wealth & prolonging her servitude Rowlatt - na appeal, na vakeel, na daleel GOI Act 1935 - Nehru - we are provided with a car, with all brakes & no engine Vs Linlithgow - GOI 1935 was the best way of maintaining British influence in India August Offer - dead as a door-nail - Nehru Cripps - Post dated cheque on a failing bank	
<u>Early political movements & formation of INC</u>		The birth of INC was the unleashing of an atomic plant, where Gandhi was the moderator & revolutionaries were the catalysts. Gokhale - Lightning conductor - catalyst to bring together nationalist forces under guise of safety valve LLR - Hume founded INC as a safety valve R.P. Dutt, - conspiracy theory - INC formation was a conspiracy to suppress a popular uprising in India, and the bourgeois (middle-class) leaders were complicit in it.	
<u>British policies</u>			

Culture

<u>Topic</u>	<u>Intro</u>	<u>Conclusion</u>	<u>Value Addition</u>

GENERAL	India ____ heritage		<u>Steps:</u>
	- Reflects the country's rich history, & <u>cultural diversity</u> - Encapsulates a <u>tapestry of diverse influences & traditions</u>	Recently announced PM Vishwakarma Kaushal Samman scheme (<u>PM VIKAS</u>) to support traditional artisans can go a long way in preserving this rich cultural heritage. “<u>Vikas Bhi Virasat Bhi</u>” - <u>PM Modi</u> - underscores the need to harness heritage for Dev. Under <u>Art 51A of Constitution</u>, it is now upon us as a fundamental duty to value, preserve this rich heritage of our composite culture. <u>Art 49</u> We can leverage the recently created <u>National Digital District Repositories</u> to also document, preserve & promote our rich cultural heritage. As president of g20, India must engage through the <u>G20 culture minister's working group</u> to promote & exhibit India's rich cultural heritage. This rich heritage must be harnessed to its full potential in line with mantra of <u>4 Cs given by PM Modi</u> during recent G20 summit namely - “<u>Culture, Creativity, Commerce and Collaboration</u>” PM Modi's recent emphasis on “<u>technology as an ally of culture</u>” underscores its immense potential of using technology to ensure better preservation of its culture. Even today, the various contributions of this period continue to <u>act as a bridge between the past & the present</u> & a <u>powerful medium of creative & narrative expression</u>.	Awareness - GI Tag, SPICMACAY, ICCR, curriculum - NEP 2020 Exchanges - Ek Bharat Shreshtha Bharat, Kashi Tamil Sangamam Leverage Cultural Tourism circuits, ODOP, Swadesh darshan Tech - VR, metaverse Maintenance - Adarsh Smarak, HRIDAY, Monument Mitra, PRASAD, Adopt a heritage program, CSR Recently set up 'Indian Institute of Heritage' (IIH) Documenting, capacity building of ASI Tribal museums NFT Modern Architecture - Parliament building, statues <u>TEMPLATE:</u> MAD LIPS M - Music A - Architecture D - Dance, Drama LiPS - Literature, language & coins P - Paintings S - Sculpture

		Period of <u>great cultural efflorescence</u> - impact continues to be visible even today _____ continue to resonate with audiences, reminding us of the timeless bond between human creativity and the divine.	
<u>PREHISTORIC</u>	Refers to a time before written records. Paleolithic, Mesolithic, Neolithic 1957-58 by V K Vakankar	The prehistoric period provides valuable insights into origin & progress of human civilisation that shaped the course of human history.	Map - - Jogimara CG - Bhimbetka, Lakhudiyar - Vindhya MP - AP - Kurnool - KN - Piklihal Taklakota - TL - Kupgallu Importance - - Harmony - man & nature - Beliefs - rituals, dances - Evolution of Family ties - Technology - paintings, tools - Tribal cultures
<u>IVC</u>	Harappan civilisation which flourished in the Bronze age (2700 - 1900 BC) was an advanced urban civilisation wrt city planning, trade & craftsmanship.	The lessons HC offers about city planning, trade, and resilience must be studied and applied especially in areas of sustainable urban development (SDG 11). The recent UNESCO world heritage status to Dholavira underscores its significance.	Seals - Pasupati, unicorn Bronzes - Dancing girl, lost wax Terracotta - Bearded priest, mother goddess - pinching method Pottery, ornaments, spindles, toys Shell factory @ Lothal Speciality - - burnt bricks, - grid planning, - advanced drainage, - Grain storage, - trade links (Dilmun, mesopotamian seals) - flood-proofing, - water harvesting - Dholavira
<u>MAURYA</u>	Common - The Mauryan period - <u>spanning from</u> 4th to 2nd CE BC - <u>marked a transformative phase</u> in history, <u>characterised by the</u> emergence of a powerful empire & cultural advancements.	Heritage of this period like the Sarnath Capital emblem, Arthashastra, spread of Buddhism etc continue to shape India's cultural, diplomatic and philosophical landscape. Bridge wala template.	Sab polished <u>Court</u> - <u>Palace</u> - Kumrahar BH - <u>Pillars</u> - Lauria nandangarh (Champaran), Sarnath - <u>Stupa</u> - Sanchi, Piprawaha - <u>Edicts</u> <u>Popular</u> - <u>Cave arch/viharas</u> - Barabar/ Lomas Rishi - <u>Sculptures</u> - Didarganj yakshini - <u>Pottery</u> - NBPW <u>Literature</u> - Arthashastra, Mukrarakshasa, SL chronicles
<u>POST MAURYA</u>	The period from the decline of the Mauryas to the rise	Template <u>Greek vs Roman</u>	<u>Architecture:</u> 1. <u>Rock cut caves</u> - - Ex: Karle, Ajanta, Udaygiri

	of the Guptas (2nd CE BC to 3rd CE AD) was marked by the advent of Indo-Greeks, Shakas, Kushanas in the North & Satavahanas in the Deccan and Shungas, Kanvas in the east.	<u>Greek</u> - strength, muscular, idealistic, marble based, Gods shown <u>Roman</u> - realism, concrete, ornamentation & decoration, real events & people shown Greeks - - strategos: military governors - chronology: Megasthenes - Drama : curtains - Sculpture, coins, trade, cities	<u>Khandagiri (OD)</u> - Kharavela 2. <u>Stupas</u> - - Ex: Amravati, Bharhut, Sanchi (Shungas - Torana) - more decortv <u>Sculpture:</u> - <u>Gandhara</u> - Greco Buddhist <u>Ex:</u> Bamiyan Buddha, Bodhisattvas - diff mudras - <u>Amravati</u> <u>Ex:</u> Narrative art - Buddha's taming of elephant - <u>Mathura</u> - HBJ <u>Ex:</u> Jain Sarvatobhadra, Vima Kadphises, Sarnath standing Buddha <u>Literature:</u> - <u>Kushanas</u> - Vatsyayana's Kamasutra, Ashvaghosha's Buddhacharitra - <u>Shungas</u> - Panini Ashtadhyayi, Patanjali Yogasutra
GUPTA Contemp: Vakatakas, Ikshwakus Kalabhras, Gangas, Kadambas	Golden period of Indian art & culture 3rd & 6th CE AD - patronage to H, B, J	<u>Template</u> <u>Ajanta</u> - Paintings : flying Apsara, Begging bowl, Padmapani, <u>Sculpture:</u> Mahaparinirvana, Mara Vijaya <u>Ellora</u> - 34 - HBJ <u>Cave 10 - Vishwakarma</u> <u>Cave 16 - Kailashnath - Rashtrakutas</u>	<u>Architecture:</u> <u>Caves:</u> <u>North</u> - Ajanta, Ellora, Bagh (MP - Rang Mahal), Udaygiri (Vidisha - Varaha), Junagarh (Buddhist) <u>South</u> - Badami - KN, Vijaywada AP <u>East</u> - Guntupalli, Ankapallee AP <u>Traveller</u> - HueinTsang <u>Sculpture</u> - <u>Bronzes</u> - Sarnath Sultanganj, Dhaneesar Khera Mathura style - <u>Stone</u> - Varaha (Udaygiri) <u>Pillars</u> - Mehrauli - Prayag Prashasti - Bhitari Pillar <u>Numismatics</u> - Samudragupta - 8 types of coins - Veena, Saraswati, gold silver cu <u>Literature</u> - Nagari script, Prayag Prashasti by Harisen - chaste sanskrit - Kalidas, Vishakhadutta, Sudraka - Panchatantra - Vishnu Sharma - Puranas, epics completed - Aryabhata - Surya Siddhantika
7th -8th CE POST GUPTA - HARSHA Pushyabhutis			<u>Literature:</u> <u>Harshavardhana</u> - Nagananda, Ratnavali, Priyadarshika

Contemp: PALLAVAS, CHALUKYAS, PANDYAS			
EARLY MEDIEVAL (8-12) 8th - 10th CE PALAS, PRATIHARAS, RASHTRAKUTA Contemp: CHOLAS			
10th - 12th CE RAJPUT HOYSALAS, KAKATIYAS			
TEMPLE ARCHITECTUR E	Temples have had great significance not just as spiritual centres but also as centres of administration, learning and community life.	As a spiritual capital of the world, India continues to nurture its rich tradition of temple making even today in India & abroad. <u>Pallavas:</u> <u>Mahendravarman</u> - mandap <u>Narsimha</u> - sculptures :rathas Ex: Mahabalipuram - Panchpandav ratha & Dropadi ratha <u>Rajsimhavarman</u> - structural temples Ex: Mahabalipuram Shore, Kailashnath Kanchipuram <u>Nandivarman</u> - smaller - Vaikuntha Perumal - Model for Brihadeshwara <u>Dravidian: Chola</u> - Gopuram, Panchayatana, only 1 vimana - Dwarpaal Ex: Brihadeswar, Rajarajeswara	<u>Nagara, Darvidian - Pallavas, Vesara</u> <u>Nagara</u> ex: Deogarh, Dashavtara, Bhitargaon - <u>OD:</u> Konark sun temple, Lingraj - no pillars, - Rekhadeul & Jagmohan, exterior lavish, Boundary wall - <u>Khajuraho</u> : Chandela, Kandariya Mahadev, Lakshmana, Chausath Yogini - Panchayatan, High platform, sandstone - Jain shrines - <u>Solanki</u> - Modhera sun temple, surya kund, wooden carvings, torana, open mandap Vesara - KN, Chalukyas, Rashtrakutas, Hoysalas <u>Medieval Temples:</u> <u>Chalukyas</u> - Ladhkan - sloping like hills, Durg @ Aihole - apsidal, Mahakuta & Swarga Brahma temple - RJ+OD style <u>Gurjar Pratihara</u> - Solanki <u>Palas & Senas</u> - B+H, Nalanda Jagaddala, Odantapuri, Bangladesh - Bangla roofs, terracotta, tall curving shikhara <u>Rashtrakutas</u> - Vesara <u>Cholas</u> <u>Hoysala</u> - Vesara, Jagati, Belur, Halebid, Sringeri <u>Rajputs</u> - Chandelas of MP <u>Vijaynagar</u> - Hampi, Combined all previous influences, Indo Islamic infl of Bijapur, all sides pe raya gopurams, Yali, kalyana mandapa, (> 1 mandapas), secular buildings, large enclosing walls

			Ex: Vithalswami temple, Virupaksha @ Hampi, Lotus mahal <u>Nayaka</u> - 16th - 18th CE - Islamic influence, Parakramas - huge corridors, largest gopurams - Meenakshi Madurai
<u>TRAVELLERS</u>			
<u>UNIVERSITIES</u>	Nalanda & Takshashila invited travellers, scholars, even statesmen from all over for multi disciplinary learning & cultural exchanges	Kashi Tamil Sangamam recently celebrates links b/w the 2 centres of learning	BH - Vikramshila, Odantapuri WB - Jagaddala TN - Kanchipuram Sharda peeth - POK
<u>BUDDHISM</u>	Buddhism was born 2600 years ago (600 - 400 BC) from teachings of Siddharta Gautama as a heterodox tradition rooted in the middle path for salvation.	- “Buddha’s teachings can solve most contemporary global problems” - PM Modi at the recently hosted Global buddhist summit in New Delhi Dukkha, Samudaya, Nirodha, Ashtangamarga Madhyamarga	Sites: <u>Stupas</u> - Sanchi, Amravati <u>Temples</u> - Gaya Mahabodhi, <u>Monasteries</u> - Aichi Ladakh, Namdroling KN, Tawang, Rumtek, Ghum <u>Caves</u> - Ajanta, Ellora, Nashik, Karle <u>Buddha’s life</u> - Sarnath, Kushinagar, Gaya <u>Literature</u> - Tripitak, Jatakas, Milinda Panho <u>Sculpture</u>
<u>JAINISM</u>	Jainism was born 2600 years ago (600-400 BC) from teachings of Lord Mahavira & the previous 23 tirthankaras as a heterodox tradition rooted in non violence & self discipline for attaining salvation.	Jainism rooted in its philosophy of non-violence/ ahimsa & anekantavada offers valuable lessons for most contemporary problems facing humanity Forgiveness - Samvatsari	<u>Architecture:</u> 1. Decorated carvings, chaumukh design, dome roofs, mountains of immortality/ hill temples Ex: Palitana/ Shetrunjay , Sammed Shikharji, monoliths (KN) 2. Earlier - rock cut - Udaygiri OD, Ellora, Sittanavasal 3. RJ - Ranakpur, Dilwara 4. MP - Khajuraho 5. KN - Gomateshwara @ Shravanbelgola 6. MH - Mangi Tungi
<u>INDO ISLAMIC ARCHITECTURE</u>	Indo-Islamic architecture, an exquisite fusion & synthesis of Islamic and indigenous styles, that began with the establishment of Delhi Sultanate in 12th CE AD	Testament to harmonious blend of cultural diversity & artistic ingenuity - that has shaped india’s architectural landscape <u>Adaptation to local traditions</u> - temple traditions of bell & chain, lotus, lintels in mihrabs, toranas Indo Saracenic = Indo Islamic + Gothic Ex: Parliament, VT, SC, St. Paul cathedral Kolkata	<u>Features:</u> Charbagh, foresightening, symmetry, Arcuade replaced trabeat etc <u>Imperial Style:</u> <u>Slave</u> - Mameluk style, remodelled Hindu Ex: Qutub minar, Adhai din ka jhopra <u>Khilji</u> - Seljuk style - Sri fort, Alai Darwaza <u>Tuglaq</u> - Batter, strength focus Ex: Tughlaqabad city <u>Lodi</u> - double domes, no lavish decoration Ex: Lodi gardens <u>Provincial style:</u> <u>Bengal</u> - Black marble, bangla roof Ex: Quadam Rasul mosque <u>Malwa</u> - Coloured stones, European influence, No minar, Env’t adaptation Ex: Hindola mahal, Jahaz mahal <u>Jaunpur</u> - sharqui style, no minars, bold

			characters on huge screens Ex: Atal mosque <u>Bijapur</u> - 3 arched facade, bulbous domes, cornices, iron clamps, Ex: Gol Gumbaz
MUGHAL ARCHITECTURE	Golden period	Same as above <u>Regional styles -</u> <u>Sikh</u> (chattris, brass copper decorations - Golden temple), <u>Rajput</u> (hanging balcony, arched cornices - Hawa mahal Jaipur)	<u>Babur</u> - Panipat & Rohilkhand mosques <u>Humayun</u> - Dinpanah city - Persian style <u>SherShah</u> - Qila e Quhunah mosque Delhi, Rohtas fort Pak, G T road <u>Akbar</u> - Red sandstone, new elements - 4 centred tudor architecture - <u>Agra fort</u> - Moti masjid, Diwan - e- aam/ khaas, Sheesh mahal - <u>Fatehpur Sikri</u> (Hindu + Persian) - Ibadat khana, Buland darwaza, Salim Chisti Tomb, Jodha Bai palace, Panchmahal <u>Jehangir</u> - paintings focus. Akbar tomb - Sikandra, Shalimar Bagh Kashmir Nur Jahan - Itmad ud Daula tomb - marble <u>Shahjahan</u> - Red fort, Jama Masjid, Shahjanabad, Peacock throne
HILL ARCHITECTURE	Blend of Kashmiri style + local adaptations like sloping roofs + Islamic Buddhist / Gandhara & Gupta influence		KASHMIR <u>Katkota, Utpala period</u> Ex: <u>Martand sun temple</u> , <u>Panderthan temple</u> - water tank attached, <u>Shalimar Bagh</u> , <u>Jama Masjid</u> - Srinagar <u>Square shaped, trefoil arches,</u> multi level sloping roofs, no domes, tall spires, pagoda shaped <u>HP - Chamba</u> <u>Laksha devi temple</u> <u>Narsimha + Mahishasur</u> <u>Yellow colour metal sculptures</u> <u>UK Kumaon</u> <u>Nagara influence</u> <u>Jageshwar (Almora) & Champavati (Pithoragarh)</u>
SANGAM			
PAINTING	Indian paintings steeped in tradition, artistic finesse are a visual testament to the country's vibrant cultural, religious & historic heritage	Dating back to prehistoric period to modern folk paintings, Rangolis & digital art in the form of NFTs - continuous legacy. <u>Vatsyayan's Kamasutra Shadanga - 6 parts of poetry</u> <u>Persian influence -</u> - <u>Miniatures</u> - <u>Fables</u> - <u>Decorated margins</u> - <u>Elevated viewpoint</u> - <u>Bright colors - golden, peacock</u>	<u>Pre-historic -</u> <u>Upper paleo</u> - 40K - 10K BC - Red & Green, Big figures <u>Meso</u> - 10K - 4K BC - small, group, headgears, Red ochre, family life, domestication <u>Chalco</u> - battle scenes, men riding horse, Ex: Jogimara, Chitwa Dongri - CH <u>IVC</u> - painted pottery <u>Murals & Miniatures</u> <u>Murals</u> - 100 BC - 10th CE AD, HBJ <u>Ajanta - Jatakas</u> <u>Ellora,</u> <u>Armamalai, Sittanavasal (pond with lotus, Samwasarana),</u> <u>Bagh,</u> <u>Badami, Vikaynagar - Lepakshi paintings & Veerbhadra temple,</u> <u>KL Murals - Padmanabhapuram palace</u>

		Indian influence - - Portraits - Flora fauna - Realism - Hindu deities Akbar - Tulinama painting from Sanskrit Sukasaptai <u>Folk paintings -</u> <u>Madhubani BH</u> <u>Warli MH</u> <u>Pichwai RJ - Nathdwara</u> <u>Pithoro GJ</u> <u>Phad RJ - scroll, local deities, Bhopas use for narrative art</u> <u>Manjusha BH</u> <u>Kalamkari AP (Srikalahasti)</u> <u>Patachitra - OD</u> <u>Patua, Kalighat - WB</u> <u>Thangka - NE, Ladakh</u> <u>Sugg:</u> GI Tag, RJ - paintings on bus stands, adaptation into textiles Ex: Kalamkari, Madhubani by Fab-India, PM VIKAS	- Kathakalli influence <u>Miniature: < 25 sq inch, 8th CE onwards, paper cloth palm leaves</u> <u>Early -</u> Pala (manuscripts, lonely figures, sinous lines, Buddhism), Apabhramsa (Geet Govinda, Kalpasutra) - <u>Sultanate - Persian + India - Nimatnanama - illustrated manusc, Lodi Khuladar styles</u> - <u>Mughal</u> <u>Babur - family tree Bizhad</u> <u>Humayun - Abdus Samad, Mir Syed Ali</u> <u>Akbar - karkhana/ Tasvir khana, awards, 3D calligraphy foresightening, court life, Hamzanama,</u> <u>Jehangir - decorated margins, pvt workshop, flora fauna - zebra, cock, Ustad Mansoor</u> <u>Shah Jahan - artificial elements, less lively, charcoal, pencil sketch, gold silver</u> <u>Regional - RJ, South India</u> Ganga Jamni confluence, influx from Deccan & Mughal courts - <u>Ragmala</u> - <u>Mewar: Sahibdin, Tamasha</u> - <u>Kishangarh - Bani Thani Sawant Singh</u> - <u>Bundi - Krishna, vegetation, colourful sky with red ribbon</u> - <u>Amber Jaipur - Dhundar, Sawai Pratap Singh</u> - <u>Marwar - Man Singh</u> <u>Pahari</u> - <u>Jammu Dogra - mythology, literature, painters - Nainsukh Manaku</u> - <u>Basholi Kangra - Krishna love scenes, sensuality, expressive faces etc</u> <u>South: Tanjore & Mysore</u>
<u>HANDICRAFT</u>	Refers to all things that can be crafted using hand for utility & decorative purposes Includes pottery, Metal craft, embroidery/ Block printing, Wood & Leather craft, Toy making, Paintings, Basket making, jewellery etc	“India takes pride in its 2,000-year-old craft heritage, with nearly 3,000 unique arts and crafts”, Modi	<u>Pottery - Long history since neolithic,</u> <u>kagazi - Alwar,</u> <u>Black pottery MN,</u> <u>Blue - Jaipur</u> <u>Khurja - UP</u> <u>Today - Kulhad revival - sustainable</u> <u>Metal craft -</u> <u>Bidri - KN</u> <u>Dokra metal craft - CG</u> <u>Utensils - Thatheras of PB - copper</u> <u>Embroidery/ Block printing -</u>

			- <u>Batik WB - wax</u> - <u>Tie & Dye Bandhej Lehariya, Ikkat</u> - <u>Kalamkari - AP</u> - <u>Jamdani - WB</u> - <u>Chikankari - UP</u> - <u>Phulkari - PB</u> - <u>Silk - Maheshwari, Kanjeevaram, Paithani</u> - <u>Applique patchwork - OD</u> - <u>Mirror work - Kutch</u> - <u>Zardosi - UP</u> <u>Wood craft -</u> - <u>Saharanpur wood work UP</u> - <u>Madurai Rosewood carving</u> <u>Leather craft - Kolhapuri chappal</u> <u>Toy making -</u> - <u>KA Chennapatna</u> - <u>Katputli RJ</u> - <u>Kondapalli AP</u> - <u>Nirmal Toys TL</u> - <u>Kitchen sets MH</u> <u>Terracotta -</u> - <u>Diyas, Kulhads, Pottery, bottles</u> - <u>Bankura horses WB</u> - <u>Roofs - Bangla roofs</u> - <u>Jewellery OD</u> - <u>Clay elephants on roof BH - signifies marriage in house</u> - <u>Pottery - Ex: Jaipur</u> - <u>MH - Ganesh Chaturthi</u>
<u>SCULPTURE</u>	India is a land where since the times of IVC till today stone and metal have been transformed into sublime expressions of devotion, beauty, and transcendence	Legacy continues at renewed scale - Statute of unity, Statute of Equality (Ramanujacharya Hyd), etc	<u>Post Maurya Stone - Gandhara, Mathura, Amravati</u> <u>Maurya - stone - yakshi, capitals</u> <u>Bronzes -</u> <u>IVC</u> <u>Jain</u> - <u>Chausa BH - Adinath long hair, Akota Vadodara - all 24 on throne</u> - <u>Shashandevi/ yakshini - Chakreshwari - Adinath</u> - <u>Dilwara</u> <u>Buddhist</u> - <u>Dhanesar Khera - Mathura style</u> - <u>Sultanganj - Sarnath style - foldless drapery</u> - <u>Vakatakas - Amravati style - Poophnar (MH)</u> - <u>Portable - Gupta, Vakataka time</u> - <u>Nalanda - Avalokiteshvara, Tara</u> <u>Hills</u> - <u>JK, HP - Buddha + Ganesha Shiva</u> - <u>Chaturanana Vishnu, Narsimha, Mahishasura Mardini Durga</u>

			HP South - <u>8-9th CE Pallavas</u> - Ardhaparyanaka Achmana mudra - <u>10-12th CE Cholas</u> - Natraja (Right hand damru), Kalyansundara - Panigrahana, Ardhanareshwar - <u>Vijaynagar 16th CE</u> - life size - idealised body, realistic expressions - Krishnadevraya with Tirumalamba & Chinnadevi - <u>Open air</u> - mahabalipuram - Descent of Ganga, Penance of Arjuna
<u>MODERN ARCHITECTURE</u>		<u>Portuguese</u> - Iberian style Patio houses Dramatic show of church strength - Ex: Basilica of <u>Bom Jesus Goa</u>, <u>Diu Fort</u> <u>Neo-Roman</u> - Circular, congested - Delhi - Edqin Lutyens & Herbert Baker	<u>French</u> - Urban planning - <u>Pondicherry</u>, <u>Chandernagore</u> <u>Cartesian grid plan</u> <u>Anonymous</u> architecture (modern building) <u>British</u> - Gothic, Neo-roman → Indo Gothic/ Victorian style Ex: Victoria memorial, Gateway of India - pointed arches, large windows, thin walls
<u>MUSIC</u>	Indian music encompasses a vast range of classical, devotional, popular genres reflecting India's deep rooted diverse & cultural heritage	Today, classical coexists in Guru Shishya parampara along with western & fusion & newer forms like Indie Pop. Need to preserve & mainstream classical & folk - SPICMACAY, Sangeet Natak Academy etc etc. Folk - no hard & fast rules, no Guru Shishya parampara, diverse themes, dance focus GJ - Dandiya raas MH - Powada, Lavani KN - Bhavgeete Goa - Ovi - women songs WB - Baulgeet AS - Bihugeet RJ - Maand - Rajput glory	Narad Muni introduced IVC - 7 holed flute Vedic - Sama Veda Later Vedic - Bharata's Natyashastra, Classification - 1. <u>Ritualistic</u> - Sangama vs 2. <u>narrative</u> - jatigan, 3. <u>classical vs folk</u> 3 pillars - Swar, raga, Taal <u>Carnatic vs Hindustani - 2 sub-genres of classical</u> Origin : - Carnatic - Bhakti movement - Hindustani - Vedic period Similarities - - same 3 pillars, religious, 1 dominant swar in each raag, melody imp Differences - H vs C - Influence of arabs, persian etc vs <u>indig</u> - Freedom to improvise - Yes vs <u>No</u> - <u>Gharanas vs no gharanans</u> - <u>Instruments not as imp as vocals</u> - <u>6 vs 72 ragas</u> - Instruments - table, sitar, sarangi vs <u>veena mridangam</u> - Imp ppl - amir khusro, Tansen vs Thyagaraja, Shyama Shastri Pandit Hindustani - Dhrupad, khayal, tarana, thumri, tappa, ghazal
